## Vertebral Tech™ Shoulder Strap

No matter which way it's worn—left shoulder, right shoulder, facing up or facing down—the Vertebral Tech™ Shoulder Strap provides comfort and support.

Our design team incessantly looks for ways to lessen the discomfort photographers feel when carrying a heavy load of camera gear. So they set out to build a more-perfect shoulder strap—one that provides long-wearing comfort, support and flexibility. The Vertebral Tech™ Shoulder Strap is the inventive result. Its name comes from the patent-pending Vertebral Tech™ spine-like structure imbedded in a double layer of EVA foam padding. More than photographers will appreciate this design—it's an ideal solution for transporting a sports bag, briefcase, duffel bag, notebook case—even a golf bag.
